Product Description

If you want an executive pen that makes a statement, then this is it. It will impress everyone who sees this pen in your hand or on your desk.

This Churchill type pen is made from beautiful amboyna burl wood. That's the stuff that the old Jaguar cars used as wooden trim. The wood compliments well with the black resin and titanium gold trim. The pen has a masculine look and has a bit more heft and weight compared to other pens with a diameter of 9/16" and overall length

of 5.375" yet still feels comfortable to write. The screw top cap can also be posted on the body of the pen when writing.

The pen uses a Schmidt type of rollerball cartridge that ensures a smooth writing experience and refills for these universal cartridges can be found at any office supply store.

This pen went through 16 sanding applications and was finished with cyanoacrylate (CA) that gives it a deep, mirror-like finish that holds up to scratches and will last for years.

The pen you see in the image is the one you will receive. You will also receive a FREE gift case to protect your pen or to present as a gift.

Thank you for visiting!
