Product Description

This Sierra pen is made from a beautiful fusion of two different acrylic materials: copper colored lava lamp and turquoise colored color explosion. This forms a great combination on a wild blank, particularly when paired with the bright two-toned copper fittings of the pen. The pen has a twist mechanism that extends the Parker type cartridge. The pen was turned by hand on my lathe in my shop. The finish was wet-sanded multiple times with progressively finer grits and then polished to give it a high luster.

The pen measures approximately 5.125 inches in length.

Impress your friends with this eye-catching pen! Or, give one as a gift to someone special or for a special occasion such as birthdays, graduations, Fathers/Mothers Day, or for employee recognition events.

The pen you see in the image is the one you will receive. You will also receive a FREE leather pen pouch to protect your pen or to present as a gift.

Thank you for visiting!
