Product Description

The Princeton style pen is modern, sleek and stylish. The wood used here is ebony that looks cool and very modern when paired with the pen's black titanium fittings. The wood has very light grain patterns, and given its polish it looks like black marble! The pen has a twist mechanism that extends the Parker type cartridge. The wood was turned by me on a lathe in my shop. The finish was sanded multiple

times with progressively finer grits and then polished to a high luster with several applications of friction polish.

The pen measures 5.50 inches in length.

The pen you see in the image is the one you will receive. You will also receive a FREE velvet sleeve to protect your pen or to present as a gift, along with a Certificate of Craftsmanship and instructions for caring for your pen. Thank you for visiting!
