## Product Description

The simple yet elegant Chrome-plated hardware on this roller ball pen lives up to its "Zen" name. It not only takes on the character of simplicity but it is stylish, stately, charismatic yet bold and pleasing to use. The ink derives from a 0.5 mm Schneider Topball 850 style refill from Germany. It demonstrates fine, clean black lines as it glides along effortlessly.

But what makes this pen truly mesmerizing is its unique magnetic cap. The cap easily posts onto the nib and back of the pen without the use of threads. And the long single tube design allows you to really show off the grain of the wood. The material used for this fine writing instrument is made primarily of the exotic Pollyanna burl wood or commonly known as the wild almond tree and is native to Laos in southeast Asia. The wood was finished with a durable 16 layer cyanoacrylate (CA) finish that ensures its scratch resistance and that the pen will be enjoyed for generations. You will receive a FREE velvet drawstring sleeve along with your purchase plus a Certificate of Authenticity. Most orders are shipped within 24 hours after purchase. Thank you for visiting!
